Le colorazioni sono suddivise in:

- fondi (tinte murarie per intonaci di fondo o elementi di rilievo)
- zoccolature (tinte murarie per elemento di base del fabbricato)
- serramenti ed oscuramenti
- ferri (smalti nella finitura opaca per inferriate, ringhiere, cancelli, etc..)

Le colorazioni proposte derivano dall'indagine svolta prevalentemente nell'ambito del centro storico; sono stati individuati i colori originari ancora visibili o le tinte coerenti con il contesto del centro storico, per ricondurli alle tonalità cromatiche su scala NCS.

La dicitura "ricorrente" evidenzia tonalità presenti o riconoscibili in più fabbricati.
